TOXICOLOGY

CONTENTS

Volume 52

Review Paper

Reactive intermediates and their toxicological significance
by T.J. Monks and S.S. Lau (Smithville and Austin, TX) 1–53

Research Papers

Correlation between cytosolic Ca^{2+} concentration and cytotoxicity in hepatocytes exposed to oxidative stress **(The data point to a relation between cytosolic Ca^{2+} and cellular damage)**
by P. Nicotera, D. McConkey, S.-Å. Svensson, G. Bellomo and S. Orrenius (Stockholm, Sweden) 55–63

Oral cadmium chloride intoxication in mice: effects of chelation (Chelator complexes modify the primary intestinal effects of cadmium according to their physico-chemical properties)
by O. Andersen, J.B. Neilsen and P. Svendsen (Odense, Denmark) 65–79

Induction and exacerbation of hyaline droplet formation in the proximal tubular cells of the kidneys from male rats receiving a variety of pharmacological agents **(Some compounds of potential pharmacological value cause a conspicuous histological alteration in renal tubular cells — only in male but not in female animals)**
by N.G. Read, P.J. Astbury, R.J.I. Morgan, D.N. Parsons and C.J. Port (Kent, U.K.) 81–101

Effects of chronic toluene exposure on central monoamine and peptide receptors and their interactions in the adult male rat **(Characteristic changes by toluene in various brain areas and functions are described)**
by G. von Euler, K. Fuxe, T. Hansson, S.-O. Ögren, L.F. Agnati, P. Eneroth, A. Härfstrand and J.-Å. Gustafsson (Stockholm, Huddinge and Södertälje, Sweden and Modena, Italy) 103–126

Inhaled soluble aerosols insolubilised by lysosomes of alveolar cells. Application to some toxic compounds; electron microprobe and ion microprobe studies **(Metals from aerosols are deposited as insoluble phosphates in alveolar cells)**
by J.P. Berry, M. Meignan, F. Escaig and P. Galle (Créteil, France) 127–139

Assessment of airway reactivity in guinea pigs: comparison of methods employing whole body plethysmography **(Exposure to stepped doses of histamine in air is the preferred procedure)**
by P.S. Thorne and M.H. Karol (Pittsburgh, PA) 141–163

Prevention of acetaminophen-induced hepatotoxicity by dimethyl sulfoxide
by Y. Park, R.D. Smith, A.B. Combs and J.P. Kehrer (Austin, TX) 165–175

Influence of glutathione on the formation of cysteine alkylation products in human hemoglobin **(Variation in glutathione protection complicates the extrapolation from hemoglobin alkylation to DNA dealkylation)**
by C.T.A. Evelo, P.Th. Henderson (Nijmegen, The Netherlands) 177–186

Cardiotoxicity of Kenyan green mamba (*Dendroaspis Angusticeps*) venom and its fractionated components in primary cultures of rat myocardial cells (**Green mamba venom induces arrhythmias and structural damage which may lead to persistent myocardial dysfunction**)
by P.M. Mbugua, A.A. Welder and D. Acosta (Austin, TX) 187–207

Uptake of ochratoxin A by slices of pig kidney cortex (**The nephrotoxin is accumulated in the tissue and seems to be transported by the organic anion transport system**)
by C. Friis, R. Brinn and B. Hald (Frederiksberg, Denmark) 209–217

Book Review 219–222

Contents of journals relating to Toxicology 223–224

Choleresis and increased biliary efflux of glutathione induced by phenolic antioxidants in rats (**GSH efflux from hepatic cells seems to be redirected towards a more biliary efflux**)
by H. Jaeschke and A. Wendel (Tuebingen, F.R.G.) 225–235

Two-year inhalation carcinogenesis studies of methyl methacrylate in rats and mice: Inflammation and degeneration of nasal epithelium (**Methyl methacrylate produced inflammation and hyperplasia of the nasal epithelium, but no tumors**)
by P.C. Chan, S.L. Eustis, J.E. Huff, J.K. Haseman and H. Ragan (Research Triangle Park, NC and Richland, WA) 237–252

Inhibitory effect of zinc on nickel subsulfide carcinogenesis in Fischer rats (**Zinc delayed development of primary tumors and reduced tendency to form metastases**)
by K.S. Kasprzak, R.M. Kovatch and L.A. Poirier (Frederick and Ijamsville, MD) 253–262

On the mechanism of transfer of heavy metals across cell membranes (**A model is proposed which describes Cd uptake into the intestine without having to involve a carrier system**)
by E.C. Foulkes (Cincinnati, OH) 263–272

Intracytoplasmic triglyceride accumulation produced by dexamethasone in adult rat hepatocytes cultivated on 3T3 cells (**Corticosteroids cause lipid accumulation in liver cells mostly through a decrease in triglyceride secretion**)
by T. Mendoza-Figueroa, A. Hernandez, M. De Lourdes Lopez and W. Kuri-Harcuch (Mexico City, Mexico) 273–286

Comparison of the effects of ascorbyl palmitate and L-ascorbic acid on paracetamol-induced hepatotoxicity in the mouse (**Ascorbyl palmitate is a good antidote against paracetamol toxicity presumably by increasing availability of ascorbic acid to the liver**)
by D. Jonker, V.S. Lee, R.J. Hargreaves and B.G. Lake (Carshalton, UK and Wageningen, The Netherlands) 287–295

Preliminary studies on toxic effects of cyclopiazonic acid alone and in combination with aflatoxin B_1 in non-human primates (**The mycotoxin has a low toxicity as assessed by histopathology, there is no synergism with aflatoxin B_1**)
by K. Jaskiewicz, P.M. Close, P.G. Thiel and R.J. Cole (Cape Town and Tygergerg, Republic of South Africa and Dawson, GA) 297–307

The potency of gamma-1,2,3,4,5,6-hexachlorocyclohexane (Lindane) (**This is a pharmacokinetic account of the convulsive action of lindane**)
by J. Portig and C. Schnorr (Marburg, F.R.G.) 309–321

Effects of the acetylcholinesterase inhibitor pinacolyl methylphosphonofluoridate (soman) on selected endocrine, glucose and catecholamine levels in fasted and fed rats (**A lack of soman-induced hyperglycemia may enhance soman toxicity**)
by H.P. Fletcher, S.A. Noble and G.R. Spratto (West Lafayette, IN) 323–329

Oral cadmium chloride intoxication in mice: diethyldithiocarbamate enhances rather than alleviates acute toxicity (**Chelation markedly alters cadmium toxicokinetics**)
by O. Andersen, J.B. Nielsen and P. Svendsen (Odense, Denmark) 331–342

Book Review 343–344
Contents of journals relating to Toxicology 345–346
Subject Index Volume 52 347–350
